

ONEVISION'S INK SAVINGS TOOL

ACHIEVE HIGH PRINTING QUALITY WITH COST SAVINGS TOO

Before

After

COST REDUCTION

- Ink Saving - Reduction of costly CMY ink
- Less paper and energy costs

ENHANCED QUALITY

- No changes in color impression
- Improved grey balance
- Less ink penetration

PRODUCTIVITY INCREASE DUE TO LESS INK

- Higher production speed; Reduced set-up time
- Less production interruption (e.g. paper break)

EASE OF USE

- Easy install and adaption
- No need for technical expertise or highly skilled color management specialist

PlugINKSAVEin is a Plugin for Asura and Asura Pro which has the ability to reduce a significant amount of ink. To achieve cost saving results, PlugINKSAVEin reseparates the CMYK print data and reduces the amount of ink usage throughout the whole document without visual variation. PlugINKSAVEin replaces expensive chromatic color components (Cyan, Magenta, Yellow) with less expensive black (K) components. With the integration of Asura and Asura Pro, PDF, PostScript, EPS and XPS files can be color optimized.

PLUGINKSAVEIN FUNCTIONALITIES

4-dimensional color space conversion with primary colors and black channel preservation.
Trouble-free usage of ICC-Profiles (no proprietary profiles required!).
Optimized color values provide less color corrections on press.
Flexibility of output formats (PDF, EPS, PostScript, TIFF, JPEG, XPS).
Preservation of spot and multi colors as well as rich black.
Normalized separations.
Easy adjustable.

BENEFIT FROM INTEGRATION IN ASURA AND ASURA PRO

Automatically corrected and optimized XPS, PDF, EPS and PostScript documents.
Adaptable to any workflow and used by any market that handles prepress files.
Detailed PDF Error Report with visualization of problematic elements.
A proven track record for reliability when writing new files.
Overinked areas are shown in the PDF Error Report.
Easy installation of ink save functionality via Plugin.
Utilization in familiar Asura environment saves training costs.
Extended lifecycle of actual production equipment (e.g. writing a lower version of PDF, EPS or PostScript like take in PDF 1.6 and write EPS Level 2).

ABOUT ASURA AND ASURA PRO

Asura is one of the leading automated software solution for hotfolder-based control, correction and optimization of files in PDF, PostScript, EPS, XPS or TIFF format. Asura automatically takes over document 'prefining', examining file contents, correcting errors on the fly, and providing a detailed log report for each document.

Adding the functionalities of PlugSPOTin, PlugFITin, PlugCROPin and PlugWEBin to the Asura application, Asura Pro offers the most advanced quality control and automated document optimization. The integration of XML and JDF job-ticket technologies, make Asura Pro one of the most future oriented software solutions integrated high volume, high quality production.
